EDUCATION

Ajay Kumar Garg Engineering College

B.Tech in Computer Science

Ryan International School

Class 12th

Ghaziabad, Uttar Pradesh, India

2021-2025

Ghaziabad, Uttar Pradesh, India

2018-2020

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript

Frontend: Shadcn, Tailwind CSS, JavaScript, ReactJS, Next.js

Backend: Node.js, Express.js, FastAPI, Flask, REST APIs, JWT, WebSockets

Databases: PostgreSQL, MongoDB, SQLite, Pinecone (Vector DB)

AI/ML: RAG, LangGraph, LangChain, Prompt Engineering, Groq API, Google Gemini AI, OpenAI

Other Tools: Cloudinary, Postman, Radix UI, GitHub

INTERSHIPS AND TRAININGS

Jr. Full Stack Developer (Intern)

Excellence Technologies Pvt. Ltd

December 2025 - Present

- Designed AI-powered backend systems including multi-agent workflows, RAG pipelines, and secure database access platforms using FastAPI, LangGraph, PostgreSQL, and Pinecone, implementing real-time APIs, LLM integrations, and production-grade audit logging.

Web Developer Intern

Eternity Global Technology Solution LLP

July 2025- December 2025

- Developed real-time MERN stack dashboard as Web Developer Intern, integrating OpenAI API for live updates in an app, enhancing user interactivity and experience.

PROJECTS

- AI-Integrated Ticket Management System :** Developed a scalable full-stack ticketing platform with multi-role dashboards (Admin/Agent/Customer), secure authentication, and role-based access control.
Integrated AI for auto-classification, summarization, and smart reply suggestions. Added Cloudinary file uploads, email notifications, Zod-validated APIs for reliability and performance.
Tech Stack:- Next.js, Tailwind CSS, MongoDB, Zod, Cloudinary, MailTrap, AI APIs [GitHub](#) Live:-[Try it !](#)
- MCP-Based Secure AI Database Access Platform:** Built a secure AI-driven database access system using FastAPI and PostgreSQL where a GPT-powered agent generates, validates, and executes SQL queries via Model Context Protocol (MCP) tools, enforcing role-based access control, query validation/dry-run safeguards, and comprehensive audit logging.
Tech Stack: FastAPI, PostgreSQL, SQLAlchemy, Alembic, MCP, OpenAI GPT, PyJWT, Passlib, Pydantic [GitHub](#)
- Real-Time Chat Application (MERN Stack) :** Built a real-time chat app with responsive UI using ReactJS and RESTful APIs with NodeJS and Express.
Engineered robust security protocols using JWT to ensure safe access controls while leveraging MongoDB to archive interaction history. Technologies :- ReactJS, NodeJS, Express, MongoDB, Socket.IO [GitHub](#) Live:-[Try it !](#)
- AI-Powered Knowledge Assistant (RAG System):** Built a full-stack document Q&A platform using Retrieval-Augmented Generation (RAG) with Pinecone vector database and Groq LLM. Implemented document chunking, embedding generation, semantic Top-K retrieval, JWT-based role authentication, and contextual chat history using Flask, MongoDB, and React [GitHub](#)
- AI Interview Scheduler (Multi-Agent System):** Built a full-stack scheduling system using FastAPI, LangGraph, and Groq LLM with intent classification, tool-based execution, SQLAlchemy ORM, and real-time agent/tool observability dashboard.
Highlights: LangGraph-based stateful workflows, LLM intent detection, tool-based execution, persistent conversation memory . [GitHub](#)Live:-[Try it !](#)

CERTIFICATES

- Web Design From Udemy**
- Java with DSA from Apna College**
